

# Healthy Females Wanted

The National Institutes of Health (NIH) in Bethesda, Maryland, seek female volunteers to participate in a research study. Doctors are researching the role of kisspeptin on hormone production in the body. Kisspeptin is a protein normally made in your body that signals the body to make reproductive hormones.

**You may be eligible if:**

- You are a healthy female, 50 to 60 years old.
- You are postmenopausal (no periods for the past 12 months).
- Your body mass index (BMI) is between 18.5 and 30.

**You may not be eligible if you:**

- Drink 10 or more alcoholic beverages a week.
- Use drugs, such as marijuana, cocaine, heroin or prescription pain medications.
- Take prescription medications, other than for seasonal allergies.

**Study details:**

- One outpatient screening visit of about two hours.
- 2-3 days inpatient stay at the NIH Clinical Center where you will receive kisspeptin through an IV in your arm.
- A one-hour follow up visit.
- Compensation will be provided.

All study visits and procedures take place at the NIH Clinical Center, America's Research Hospital in Bethesda, Maryland. Located on the Metro red line (Medical Center stop). Parking is provided at no cost.
